

## Spark Plugs

Heavy-duty nickel chromium ground electrode - up to 31% larger than the competitions - assures maximum performance

Copper core center electrode in heavy-duty nickel alloy jacket - up to 26% larger than competitive plugs - gives you consistent performance and prolonged service life

Nickel-plated rolled threads for complete anti-seize and corrosion protection

Patented suppressor-resistor design ensured long term voltage stability throughout the service life of resistor-type spark plugs

Five-rib angular insulator design provides additional protection against current leakage

**BOSCH**
