

tiller **Badger**

**So smooth, you can guide it with one hand!**

It's the only front-tine rototiller on the market that maintains easy, operational control and smooth, comfortable digging even in uncultivated soil. So whether you're turning up soft, cultivated soil or cutting through tough sod or hard soil, count on the rugged performance of the Earthquake® 3365

- ❑ The Earthquake® 3365 gives you the incredible maneuverability you want from a front-tine rototiller with all the power of a reartine.
- ❑ Get around tight corners and narrow rows with the maneuvering ease of a front-tine. Plus, get all the operational control and power of a rear-tine!
- ❑ Exclusive cast iron tail mount assembly and Isovibe™ pivoting drag-stake system absorbs machine vibration and maintains optimal digging level for smooth, comfortable handling
- ❑ Sturdy 1" solid steel tine shaft for long-life and rugged performance
- ❑ Front-tine design offers preferred visibility – see your work area better and till precisely the area you want
- ❑ Tall 12" diameter transport wheels prevent tines from digging too deep and getting buried in soil
- ❑ Handlebar folds down for easy storage and transport to multiple locations
- ❑ Bold red finish – durable weatherproof powdercoat finish
- ❑ All steel construction
- ❑ High alloy brass gears
- ❑ Belt engagement clutch
